

Visionary Analytics aims for outstandingly valuable and innovative research and strives to become a quality standard in this sector. Our comparative advantage rests on shared values as well as highly qualified and motivated staff. Currently we are expanding our team and looking for:

RESEARCHER

LABOUR MARKET AND EDUCATION POLICY RESEARCH

Key responsibilities:

- Quantitative (databases, surveys, statistics) and qualitative (interviews, reviews, etc.) data collection, analysis and generation of findings, conclusions.
- Development of research reports and other documents in Lithuanian and English, including the procurement documentation.
- Management of research and evaluation projects, including participation in meetings and presentation of findings and results.

Key requirements (a candidate should have):

1. Master degree (MSc, MA, MBA) in social sciences (political science, management, economics, sociology) and related fields;
2. Exceptional academic writing and presentation skills in English (C2 level) and Lithuanian;
3. At least three (3) years of analytical work or other project-based research experiences;
4. Ability to consistently apply quantitative research and statistical analysis.

Key advantages (the following skills and abilities will be considered as advantage):

- Work experience in providing research, policy analysis and evaluation services to the European Commission or foreign educational institutions would be an advantage;
- Familiarity with labour market and education policies desired.

Visionary Analytics values its employees and thus offers:

- Exciting, demanding and highly supportive working environment;
- Competitive salary;
- Flexible work conditions;
- Dynamic, creative, results oriented and promising work with international clients and partners in developing economy, education policies both in EU and Lithuania;
- Continuous professional growth within the team of qualified experts and considerable investments into your further training;
- Long-term commitment to your careers.

If you could demonstrate ability to learn quickly and work independently, have a collaborative spirit, like to assume responsibility, have aspirations for long-term career and partnership - this is your desired position! If you have skills necessary for this work, please send us your up-to-date **CV** with a **recent paper** which you prepared during your studies or applied research work to lina@visionary.lt. **Recommendation(s)** from previous/recent employer and/or academic advisor are desired.

Visionary Analytics (VA) is private policy research centre providing applied research, evaluation and technical assistance services for European Commission institutions, international organisations and Governmental institutions of Lithuania. VA services focus across three domains: education, innovation and methods (applied research and studies, impact assessment, policy evaluation, foresight analysis, etc.). By way of example, our recent work has involved the following:

- Identification of Smart Specialisation (R&D) priorities for Lithuania;
- Ex post Evaluation of ERDF investments into SMEs and Innovation for European Commission, DG Regional and Urban Policy;
- Measuring performance of EU Member States skills systems and prioritising skill mismatches for European Commission, CEDEFOP.
